# OUR STORY

In 2019, we developed the Grill Fanatics label. From our company, Roos-KCB Holland BV, we saw an opportunity for a tough, contemporary brand offering BBQ consumables to catering wholesalers, caterers, and BBQ specialist stores. What began as a compact range for the Dutch market has grown into a recognised name in the BBQ world, with around 120 products sold in nearly 30 European countries.

Grill Fanatics stands for high-quality products, shaped by market trends and a passion for BBQ. We're constantly evolving—adding and improving where it matters most. From our head office, showroom and warehouse in Dronten (NL), we ensure fast, reliable deliveries and provide full support in marketing the brand with displays, POS materials, logos, and more.

In 2025, we're proud to introduce our own Grill Fanatics webshop—a key step in strengthening online visibility and increasing brand awareness. The webshop not only connects us with more BBQ lovers, but also reinforces our retail network by giving all physical sales points a clear presence. It's an extension of our shared success—online and offline.

We're growing fast and know there's still huge potential. So if you're a retailer or wholesaler serving true grill fanatics, this label belongs in your assortment.

**See you soon!**

Niels Baars, Director

# Quality Marks

We believe it is important to deliver high-quality products. Apart from our commitment to the delivery of products, we also contribute to the preservation of our forests and the improvement of working conditions. That is why we comply with all relevant European quality standards and adhere to certifications that we deem valuable in acting on our beliefs.

## Approved by European standards

We guarantee that our products are of a high quality: They meet the relevant quality standards and carry the quality marks. Our charcoal, briquettes and firelighters meet the European requirements and standards (EN1860-2 and EN1860-3).

### FSC® certified

Whenever possible our products are FSC® certified. You can find our certification under number FSC®C117418. On request we can deliver FSC® certified products.

### BSCI certified

We are certified under the BSCI (Business Social Compliance Initiative). BSCI aims to improve the working conditions, such as the right to establish a trade union, safety, and protection against both forced and child labour.

### ISO 9001 certified

Quality is of paramount importance to our organization. That is why we are very proud of our ISO 9001 certification. ISO 9001 is a well-established concept in almost every sector: It is an internationally recognized standard in the field of quality management and therefore a benchmark for transparency and reliability in the market. For us, obtaining the certificate is not a goal in itself, but a method to grow as an organization and to continue to do the right things in the right way. This benefits the quality of our organization and products.

A wooden cutting board with a logo in the bottom left corner that reads "GRILL FANATICS" with a stylized "GF" monogram. On the board are three types of grilled food: a salmon fillet topped with dill and lemon slices, a large piece of smoked brisket, and two racks of BBQ ribs. A dark, semi-transparent hexagonal overlay is centered over the food.

*"We offer you any  
marketing support."*

# MARKETING SUPPORT

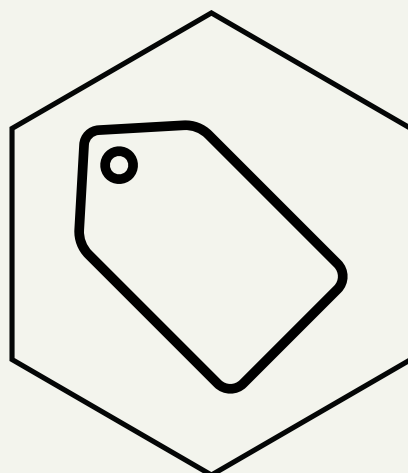

## Displays

We can supply our own Grill Fanatics displays in your shop. One filled to the hard sellers from our range. And the other one filled with our BBQ Rubs.

## Logos & pictures

When you become a Grill Fanatics dealer, you have access to our database of photos and logos. You may use these photos and logos to market Grill Fanatics.

## POS materials

Do you want ready-made POS materials for in-store use? We can help with that too. Magnetic photos, floor stickers, ceiling hangers it's all possible.

## Charcoal and briquettes

There are many different types of charcoal. The difference often lies in the hardness of the wood and size of the pieces. Such factors determine how hot the charcoal and briquettes becomes and how long they generate sufficient heat.

Our charcoal is of high quality, suitable for long grilling at a lower temperature or for short grilling at a higher temperature, whatever is needed for the preparation of the dish.

For the formation of our briquettes from the charcoal grit, we exclusively use a natural binder.

# SMOKING WOODS AND PLANKS

Using smoking wood adds extra flavor to meat, fish, and vegetable dishes. We offer several types of smoking wood in our assortment:

- Smoking chips: smaller pieces of wood for hot smoking;
- Smoking chunks: larger blocks of wood to be put directly between the burning coals;
- Smoking dust: very fine wood (almost sawdust) for cold smoking;
- Smoking planks: planks on which meat and fish are placed for hot smoking.

We offer these smoking wood products in different flavors to suit for different culinary touches.
